FLEXIBLE COUPLINGS

Octopus Plumbing has launched a wide, new range of metal banded flexible couplings to help solve many common plumbing problems. All couplings are fully AS/NZS 4327 approved. They are constructed from Type A PVC and are fitted with stainless steel hose clamps (316SS) so they are ready to go. All the common domestic pipe sizes are covered, from 32-150mm. The large range consists of regular PVC couplings, plus adapter couplings, clay couplings, tees, elbows, caps and more.
